

Sumit Ojha (Mobile App Developer)

Indore, Madhya Pradesh, India | sumitojha264@gmail.com | + (91) 9009353690

<https://www.linkedin.com/in/sumit-ojha-dev> | <https://github.com/Sumit-Dev-07>

Results-driven Mobile App Developer with **5 years** of hands-on experience building production-grade Android and Flutter applications. Delivered apps with **50,000+** downloads and **4.0+ ratings**. Proficient in Kotlin, Dart, Jetpack Compose, MVVM/Clean Architecture, RESTful APIs, and payment gateway integrations. Proven ability to architect scalable apps, lead feature development end-to-end, and collaborate cross-functionally. Actively expanding expertise in unit/widget testing and CI/CD pipelines.

TECHNICAL SKILLS

Languages: Kotlin, Core Java, Dart, XML.

Android: Jetpack Compose, Android SDK, Dagger Hilt, Room, Retrofit, Volley, Coroutines, LiveData, StateFlow.

Flutter: Bloc, Getx, http, dio, flutter_local_notification, go_router.

Architecture: MVVM, Clean Architecture, MVC, SOLID Principles, Repository Pattern.

APIs & Cloud: Firebase (Auth, Firestore, FCM, Crashlytics, Deep Linking), RESTful APIs, Socket.IO.

Dev Tools: Android Studio, Git, GitHub, Bitbucket, Postman, Jira, Zoho, Figma, Gradle.

Distribution: Google Play Store, Apple App Store.

WORK EXPERIENCE

HEXALITICS TECHNOLOGY PVT. LTD

Indore, Madhya Pradesh, India

Mobile App Developer (Android | Flutter)

MAY 2023 - Present

- Built high-performance cross-platform Flutter applications, increasing user engagement by 25% through optimized UI rendering and smooth Getx and BLoC-driven state management.
- Integrated RESTful APIs using HTTP and dio packages with proper error handling, retry logic, and response caching for efficient data communication.
- Adopted the BLoC pattern across the codebase, improving app responsiveness by 25% and making features easier to unit-test and maintain independently.
- Integrated Razorpay and PhonePe payment gateways, enabling secure in-app transactions with proper callback handling and failure recovery flows.
- Managed end-to-end app publishing on Google Play Store and Apple App Store, adhering to platform guidelines and review processes.

Android Developer

MAY 2021 - APRIL 2023

- Engineered responsive Android apps in Kotlin and Java; migrated legacy code to modern patterns, resulting in measurable improvement in crash-free sessions and user retention.
- Implemented MVVM architecture with Dagger Hilt, reducing boilerplate by 40% and enabling fully unit-testable ViewModels across multiple modules.
- Built real-time chat functionality using Socket.IO, enabling seamless communication between users.
- Integrated Firebase services: push notifications (FCM), OTP authentication, Crashlytics for crash tracking, and Dynamic Links for deep linking.
- Integrated Razorpay payment gateway with support for UPI, cards, and net banking, ensuring smooth and reliable transaction processing.

- Deployed and maintained multiple Play Store applications, managing version releases, changelogs, and responding to user feedback

KEY PROJECTS

[The Holy Bible Living Words \(Android App – Kotlin\)](#)

- Built a Bible reading and listening application on the Google Play Store, enabling users to read scriptures, listen to audio content, and access spiritual resources seamlessly.
- Architected the application using MVVM, Coroutines, and Dagger-Hilt, ensuring maintainable code, efficient asynchronous operations, and scalable dependency management.
- Integrated Retrofit for API communication and Room Database for offline storage, implementing CRUD operations and smooth database migration strategies.
- Implemented Firebase Cloud Messaging (FCM) to deliver real-time notifications and user engagement updates.
- Collaborated with cross-functional team members using Trello for task management, sprint tracking, and timely feature delivery while maintaining high code quality standards.

[Close Care \(Healthcare Appointment App – Flutter\)](#)

- Developed a cross-platform healthcare application for Android and iOS, enabling patients to discover doctors, schedule appointments, manage medical records, and access healthcare services conveniently.
- Designed and implemented the application using Flutter (Dart) and MVVM architecture, ensuring maintainable code structure, modular development, and efficient feature scalability.
- Utilized GetX for state management, dependency injection, and route handling, resulting in responsive UI updates and streamlined application flow.
- Integrated RESTful APIs using the Dio networking library, handling authentication, data synchronization, error management, and secure communication with backend services.
- Implemented Firebase Cloud Messaging (FCM) to provide real-time notifications, appointment reminders, and instant updates, enhancing patient engagement and communication.

[Spacr \(Android App – Kotlin\)](#)

- Maintained and enhanced an Android-based logistics marketplace application that connects shippers with flight travelers, enabling cost-effective product transportation through mutually agreed-upon delivery offers.
- Implemented Google Sign-In using Firebase Authentication, providing secure user onboarding and seamless account management for both shippers and travelers.
- Integrated RESTful APIs using Retrofit to manage shipment creation, booking requests, offer negotiations, user profiles, and real-time shipment tracking.
- Developed features for posting shipment requirements, browsing available travel routes, and facilitating communication between users to streamline the delivery process.
- Implemented Firebase Cloud Messaging (FCM) to deliver instant notifications for shipment updates, offer responses, booking confirmations, and transaction status changes.

POSITION OF RESPONSIBILITY

Coding and Debugging: Write clean, efficient, well-documented code to implement app features and functionalities. Identify and fix bugs to ensure smooth app performance.

Testing and Deployment: Conduct thorough testing on different devices and platforms to ensure app functionality and user experience. Then, in accordance with Google's guidelines, the app will be deployed to the Google Play Store.

Collaboration: Work closely with designers, product managers, and other developers to ensure a cohesive and successful development process.

Communication: Communicate effectively with clients to gather requirements, provide status updates, and address any concerns.

Project Management: Manage assigned mobile app development projects, including planning, resource allocation, and meeting deadlines.

ACHIEVEMENTS

- Successfully delivered multiple high-quality mobile applications with over 50,000+ downloads across the Google Play Store, resulting in a 4.0+ star rating.
- Consistently met project timelines by effectively managing tasks, reducing lead time, and ensuring on-time app delivery through strong task management and planning.
- Received positive feedback from clients for delivering scalable, user-friendly mobile apps on time.
